

Geobags: small volume sand filled container

- Filled on land or above water and then **pattern-placed** either near water or below water
- Normally 0.05 to 5 m³ in volume
- Manufactured in various shapes
 - Pillow-shaped,
 - Box-shaped,
- Manufactured in various fabric
 - Composite fabric
 - Woven fabric
- Good geometrical tolerances are possible
- Rapid mobilisation and easy to use erosion protection units

Types of Geobag

Composite Geobag
Sand & Green Color

Woven Geobag

Non-woven Geobag

Installation Procedure – Geobag
